

Memo

To: Tom Meyer, Interim City Administrator
From: Gary D. Wilfong, City Engineer *gw*
CC: Tricia Sandahl, Planner II
Date: 10/19/06
Re: Levee

Tricia Sandahl, Bill Stangler, and myself have met with the Army Corps of Engineers regarding the levee. We discussed the programs for improving this location. The Corps is proceeding with the reconnaissance study. This study will take approximately 12-24 months to be completed and approved.

The Engineering Department is working with Terracon to perform some core samples on the levee to better determine its makeup. In addition, the City will have contractor in the area in the upcoming weeks for a storm sewer project. That contractor has been contacted regarding some cleanup and work on the levee.
